SUMMARY

Computer Science graduate and full-stack developer who builds complete web products, from database design and APIs to polished, responsive interfaces. Experienced with Next.js, React, TypeScript, Node.js and Python, with e-commerce and CMS platforms as a secondary strength. Growing specialization in AI-powered applications, including text classification, automated query routing and AI-assisted reply drafting. Delivers production-ready work for clients and handles requirements, deployment and post-launch support end to end.

CORE SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Framer Motion, HTML, CSS, Responsive UI Design
Backend and APIs: Node.js, Python, Django, FastAPI, Flask, PHP, Strapi, Prisma, REST API, JWT Authentication
Databases and Services: PostgreSQL, MySQL, Supabase, Cloudinary, Database Design
E-Commerce and CMS: WordPress, Shopify, WooCommerce, Medusa.js, PayFast Payment Integration
AI and Automation: NLP (NLTK), TF-IDF, NumPy, Pandas, scikit-learn, PyTorch, TensorFlow, Matplotlib, Third-Party API Integration
Deployment and Tools: Vercel, Azure, Git, SEO, Performance Optimization

PROFESSIONAL EXPERIENCE

Independent Full-Stack Developer | Freelance / Contract | December 2024 – Present

- Design, build and deploy production web applications and e-commerce platforms for clients across academic, retail, furniture and fashion businesses.
- Manage the full lifecycle: requirements analysis, system design, implementation, testing, deployment and post-launch support.
- Build with Next.js, React, TypeScript and Node.js, and with WordPress, WooCommerce and Shopify where a CMS fits the client better.
- Handle SEO, performance optimization and third-party integrations as part of each delivery.

SELECTED PROJECTS

Sovereign - Luxury Watch E-Commerce Platform | Next.js, TypeScript, Tailwind CSS, Supabase, PayFast, Framer Motion

- Developed a full e-commerce system with catalog, cart, checkout, customer accounts and order tracking.
- Built a store-management portal for catalog and order administration.

Smart Query Routing & Email Automation System | Next.js, TypeScript, Python, FastAPI, Prisma, PostgreSQL

- Designed a university query-management platform that centralizes student requests from web forms, email and WhatsApp.
- Implemented automated query classification, department routing, time-based escalation and AI-assisted reply drafting.
- Included role-based access, real-time status tracking, administrative analytics and audit logging.

Community Skill Exchange Platform | Next.js, TypeScript, Tailwind CSS, Strapi, Supabase, Cloudinary

- Built a peer-to-peer skill-exchange platform with listings, exchange requests, two-sided completion confirmation, reviews and admin moderation.

Graze Smasher: Fake Review Detection System | Python, Django, scikit-learn, NLTK, TF-IDF, Bootstrap 5

- Built an end-to-end NLP pipeline that classifies product reviews as genuine or fake, trained on a balanced 10,000-review subset of the Salminen et al. fake reviews dataset (80/20 train-test split). Preprocessed text with NLTK and trained a TF-IDF plus LinearSVC model, reaching 90.95% accuracy and 90.94% F1-score on the held-out test set.
- Served the trained model through a Django web application with a Bootstrap 5 interface for live review prediction.

EDUCATION

VIRTUAL UNIVERSITY OF PAKISTAN
Bachelor of Science in Computer Science | Pakistan | October 2022 – September 2026 | CGPA: 3.73/4.0
Final Year Project: Smart Query Routing & Email Automation System

CERTIFICATIONS

- The Freelance Stack: Real Project with NextJS and Strapi (Coursera)
- Build a Full Website using WordPress (Coursera)
- Use WordPress to Create a Blog for your Business (Coursera)
- Create your E-commerce Store with Shopify (Coursera)
